Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bowman, IV et al. 6,427,088 in view of Borrás USPN 5,128,938. Bowman teaches a medical device having power saving shutdowns and having a communication device. Bowman does not teach the use of a preamble that may send a signal (preamble) predicting the next time interval for switching to a low energy state. Borrás teaches an adjustable communication system to also save power. The central unit can predict the next time usage of the device based upon historical usage and send a signal (preamble) for adjusting the interval of the low energy state. To have used the Borrás technique to adjust reduce the amount of power consumed in Bowman to provide for adjustable sleep times would have been obvious. Borrás sends messages separately. To have arranged the bit members as desired to accomplish the meaning is an obvious design choice.
